Some Place Like Home

Homeless Assistance Center
2010-2011 ACSA/AISC Steel Design Student Competition

Monday, Wednesday & Friday
1-5:00 PM
Location: TBD

“We believe all people in Oregon should have the opportunity to be at home in their communities and be physically, emotionally, and economically healthy”

The State of Oregon’s Ending Homelessness Advisory Council (EHAC)
A Home for Hope: 10-year plan to end homelessness in Oregon

In 2008, The State of Oregon’s Ending Homelessness Advisory Council (EHAC) developed its 10-year plan to end homelessness in Oregon. Towards that end, this studio will investigate the design of a Homeless Assistance Center for the City of Eugene. Investigations will involve a survey of existing models for managing homelessness and students will be expected to develop proposals that seek to eliminate homelessness by addressing the social, political, and economic issues at the root of the problem. Students will have the opportunity to submit their proposals for the ACSA/AISC Steel Design Student Competition. Therefore, in addition to exploring issues of homelessness, this studio will also be investigating the use of structural steel as a building material.

For more information see the competition website:
