Building Greenscapes – II

Course: ARCH 4/507  CRN: tbd, 2 credit hours
This 2-credit course is to be taken in conjunction with the 2-credit course called Building Greenscapes-I offered by the same instructor last Winter 2012 to fulfill the Advanced Technology requirement

Prerequisite: Building Greenscapes I

Instructor: Adjunct Professor Ben Vaughn, bvaughn@walkermacy.com
Associate, Walker Macy Landscape Architects

Class Meeting: Wednesday, time 10:30am to 12:30pm
White Stag Building - Room TBD

Course Description
This course will build on the principles leaned during the first term and apply them in a cumulative series of design exercise for spring term. In studio format, students will analyze, diagram, and detail building greenscapes through class exercise, discussion, and weekly assignments. Through the class assignment students gain a detailed understanding of the following:
- Code Requirements
- Cost Analysis
- Sustainable Diagramming
- Multiple Benefit Systems
- Detailing
- Grading
- Professional Lessons Learned

Reading Assignment
To be electronically distributed through the course of the term.

Requirements:
Student participation includes: In class discussion, attendance, the completion of weekly in-class and homework assignments. Class assignments will culminate in a comprehensive building greenscape project based on student’s studio project or instructors assigned project.

Graduate students will additionally be required to present their case studies to the class and lead a class discussion.
