IARC 473/573: WORKING DRAWINGS for INTERIOR ARCHITECTURE
Tuesday & Thursday, 4:00-5:50pm
Lawrence Hall 278 (Tuesdays), Klamath Hall B26 (Thursdays)
Instructor: Paul DeJong

The course will cover the elements that comprise a small set of construction documents and will inspire an appreciation of the composition and detail associated with these important documents. Learning AutoCAD and applying it to your designs is required. The course is a companion with the 487/587 Working Drawings Studio, which includes an adaptive-reuse of a small building in town and mixes the design with an attention to savvy detailing and sustainable thinking.
