ARCH 4/507
THE DESIGN OF SUSTAINABLE AND AFFORDABLE HOUSING:

A review of 75 case studies of affordable housing designed by Pyatok Architects

M. Pyatok
Thursday 9.00am – 12.00pm

The course will be a series of lectures reviewing the social, political, economic, cultural and regulatory forces that shaped specific housing developments and mixed-use projects in urban and suburban regions. The presentation of case studies will be followed by Q&A and discussion.

There will 2 assignments, one due at mid term and one at the end of term.

Assignment A: students, working in pairs, will report on one project that was government-subsidized within an industrialized country. The report will be presented in PowerPoint format—2 pages that can be reproduced on 11x17 sheets.

Assignment B: students, working in pairs, will report on one project that was subsidized by government or non-governmental agencies within a developing country. The report will be presented in PowerPoint format—2 pages that can be reproduced on 11x17 sheets.
