ARCH 476/576: RESIDENTIAL CONSTRUCTION
Linking Construction to Design

Professor: Rob Thallon
Associate Professor
Office: 371 Lawrence Hall
thallon@uoregon.edu

Schedule: Tu/Th 10:00 - 11:50 a.m., Room 279 Lawrence Hall, seminar format

Prereq’s: 3rd year undergrad or 2nd year grad Track 1 or any grad Track 2

Credits: 4 Credit Hours, satisfies advanced technical option in Architecture.

Grading: Optional -- Graded or P/N

Course Description:
The seminar format course will focus on the basic principles of residential construction and how these affect design. The course will be taught through lectures, readings, class presentations, class discussions, field trips, and projects. There will be an emphasis on standard construction methods and how these can be employed most effectively, but alternative methods will be explored as well. Sustainability and environmental responsibility will be discussed in relation to materials, systems, and methods. Grading will be primarily project-based.
