Gresham City Hall

ARCH 484/584  Architecture Design Studio  
WINTER 2009, Credits:  6

Portland:  Instructor, Kelcey Beardsley  
Eugene:  Instructor, Erin Moore

STUDIO DESCRIPTION

As participants in Sustainable City Year Gresham, students will develop architectural proposals for a new city hall for the City of Gresham that will serve as a banner of sustainability for the community. Students will be encouraged to use living building principles to envision a building that generates rather than depletes clean air, water, and habitat and that offers potential for long-term carbon sequestration and ecologically rich public space.

JOINT STUDIO SCHEDULE

These are two different studio sections (one in Eugene and one in Portland) with shared content and schedule. There will be three joint field trips in the Portland area, a shared conceptual review in Eugene, a joint schematic design review in Portland, and separate final reviews.

FACULTY

Kelcey Beardsley, IDEC, is an architect, artist, and educator with twenty-three years professional practice in Eugene, Portland and Seattle. She is visiting adjunct faculty in the Department of Architecture where she teaches design media and studio.

Erin Moore, is Assistant Professor in the Department of Architecture and principal of FLOAT architectural research and design.
