I have not yet selected a building project. It will probably be a mid-size building somewhere between 20 and 40,000 square feet housing a public program such as a Library, Museum, or School. In general this studio will emphasize:

1. The issues of building organization, site arrangement, and building form.
2. Development of the spatial system and its light.
4. Student commitment to design work and the studio format.

Be forewarned that there will be an insistence on the use of hand drawing and that the use of computer graphics will be severely restricted.
